Summary Experienced Frontend Developer with over 1 year of experience crafting impactful web applications for Business Intelligence Solutions. Expertise in React JS, Next JS, Vue JS, Redux, OOP, API Integration, Context API, REST APIs, Material UI, JavaScript, Postman API, Git, GitHub, JSON, JavaScript ES5, JavaScript ES6, Tailwind CSS, HTML, CSS, Bootstrap, and WordPress. Eager collaborator and quick learner, ready to contribute to your team's success.

*Education: BS Software Engineering (*2019 – 2023) *From the Hazara University – Garden Campus* (CGPA 3.53)

Professional Experience:
Frontend Developer Intern (Nov 2023 – May 2024) at Codematics Inc.

- Led the development of multi-sites using React, Next, Tailwind UI, and APIs for engaging user experiences.
- Built dynamic and responsive frontend components using React with Chakra UI, Material UI, Tailwind CSS, and Bootstrap.
- Integrated APIs with frontend for improved user experience.
- Converted Figma designs into ReactJS components for a professional appearance.
- Analyzed, debugged, and resolved implementation issues.
- Provided daily progress updates to Team Lead and Project Manager.

Frontend Developer Intern (Sep 2023 – Oct 2023) at Urraan Digital Flight

- Worked on frontend UI development, learning HTML, CSS, Bootstrap, JavaScript, and Vue.JS.
- Expanded foundational knowledge in web development, including client/server-side concepts.
- Contributed to key features, enhancing overall functionality and user experience of the web application.
- Engaged in bug fixes, code changes, and additional feature implementations.
- Demonstrated adaptability and quickly acquired proficiency in frontend development practices.

Projects During Internship:
1) *Kardaan Services (Website – Frontend Development)*
- Developed custom React components for frontend development.
- Integrated APIs for dynamic content loading and infinite scroll functionality.
- Utilized the Context API for state management.
- Implemented form validation and routing functionalities.
- Optimized codebase and addressed performance-related issues.
- Enhanced responsive web design to ensure compatibility across all devices.
- Executed bug fixes and additional implementations for a smooth user experience.

2) *Dashboard Kardaan Services (Frontend Development)*
- Developed RESTful APIs and CRUD Operations.
- Utilized the Context API for State Management
- Applied form validation, data filtering, user authentication and authorization.
- Created login and logout functionality, dynamic routing, and protecting routes.
- Executed bug fixes and additional implementations for a smooth user experience.

Other Projects

1) ***WordPress Website for Mansehra Police***

- Contributed to the design and development of a WordPress website for Mansehra Police.

Project Link: https://mansehrapolice.com.pk/

2) ***Real-time Vehicle Tracking app using Smartphone (FYP)***

- Led a team in developing a "Real-time Vehicle Tracking System Using Smartphone" for the final year project.
- Completed within a 4-month timeframe, showcasing leadership skills while designing and implementing a robust solution for real-time vehicle monitoring.
- Obtained valuable experience in project management, software development, and problem-solving.
- Technologies used: React, Flutter, C#, and MongoDB

Skills & Tools:

Frontend Development	
React JS	Redux
Next JS	Vue JS
OOP	API Integration
Context API	REST API's
Material UI	JavaScript
Postman API	Git
GitHub	JSON
JavaScript ES5	JavaScript ES6
Tailwind CSS	Bootstrap
HTML	CSS
WordPress	

Languages:

- English
- Urdu
- Pashto

Certifications:

- React Basics (From Meta – Coursera)
- Programming with JavaScript (From Meta – Coursera)
- Version Control (From Meta – Coursera)
- Introduction to Frontend Development (From Meta – Coursera)
- HTML, CSS, in Depth (From Meta – Coursera)
- Web Development with HTML, CSS, JavaScript Essentials (From IBM – Coursera)
- C# For .NET Developers (From Board Infinity – Coursera)
- Freelancing (From DigiSkills.pk)
